MEMORANDUM FOR: Director of Central Intelligence

FROM: John N. McMahon
Executive Director

SUBJECT: Cabinet Meeting, 20 May 1982, 12:00 Noon

1. Attached are the handouts which were discussed at the Cabinet meeting. The key was a budget update by Joseph Wright. President took the position that we should not react to any of the proposals as yet but wait for Congress to get its act together. He also encouraged the Cabinet members not to respond independently to the various budget proposals.

2. Regan then commented on the OECD ministerial meetings. His comments seemed somewhat dated and did not contain the information as noted [redacted] I have asked the DDI to make sure Regan is aware of our latest reporting.

3. Anne Gorsuch then skipped the Clean Water Act and talked about her trip to Nairobi and addressed the EPA annual report.

4. Ed Meese was kind enough to introduce me so I got to shake the hands of all the notables.
